FISHHUB

Baa: Goidhoo, Fulhadhoo & Fehendhoo

Southern Baa / Horsburgh Atoll | Separate day excursion from Thoddoo

© OpenStreetMap contributors | openstreetmap.org/copyright | WGS84 reference positions

PRIORITY BAA DAY-TRIP AREA

1 Goidhoo - proposed lunch hub

Use this island as the logistics anchor. Arrange lunch ashore; choose actual fishing grounds after scouting. The pin is not a harbour approach or a catch location.

2 Fulhadhoo - published fishing base

Regional targets: **GT, bluefin trevally, dogtooth tuna, yellowfin tuna and wahoo**. Local operators also advertise snapper on jigging/popping trips. [1,2]

3 Fehendhoo - scouting reference

A useful island reference within the same small atoll. No specific lure-fishing hotspot or point-level catch record has been verified here.

SELECTED PROTECTED-SITE REFERENCES

P1 Goidhoo Koaru
P2 Innafushi area
P3 Corbin wreck area
P4 Mathifaru Huraa

Pins are reference centres, not boundaries. Check the official area and permitted activities before selecting fishing marks. This is not a complete protected-area inventory.

Suggested product: jigging and casting in verified permitted areas, with offshore trolling only when conditions and fuel allow. Return to Thoddoo the same day; no BBQ.

Targets are operator-reported for the region, not guaranteed catches at these pins. GT = giant trevally. Source links and distance comparison: page 3.

FISHHUB

Vaavu: Fulidhoo focus & wider references

Northern Vaavu day-trip concept | Keyodhoo shown for context, not a promised extension

© OpenStreetMap contributors | openstreetmap.org/copyright | WGS84 reference positions

FULIDHOO FIRST - RANGE STILL UNVERIFIED

4 Fulidhoo - proposed day-trip hub

Published regional targets include **GT, dogtooth tuna, wahoo, mahi-mahi, snapper and grouper**; sailfish is also advertised. Lunch ashore at Fulidhoo, then return to Thoddoo. [3]

5 Keyodhoo - documented fishing base

Vaavu operators describe **GT on poppers/stickbaits**, dogtooth and grouper on jigs, and yellowfin plus pelagic trolling targets. This southern reference adds travel beyond Fulidhoo. [4]

6 Thinadhoo - scouting reference

Geographic anchor beside the Felidhoo/Keyodhoo sector. No exact fishing mark is verified. Do not add this sector to the same-day offer before a measured trial.

SELECTED PROTECTED-SITE REFERENCES

P5 Huraafalhu
P6 Miyaru Kandu
P7 Huralhu Kandu
P8 Rakeedhoo Corner

Pins are reference centres, not boundaries. Check the official area and permitted activities before selecting fishing marks. This is not a complete protected-area inventory.

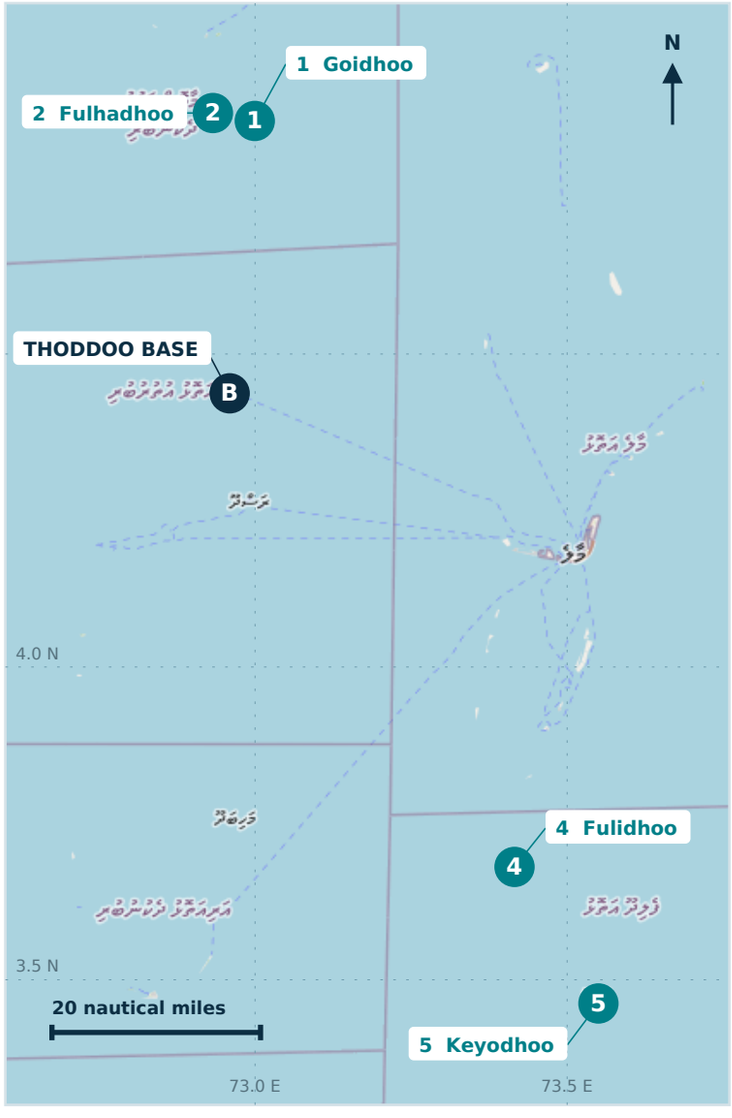

Commercial decision: keep Vaavu on request until your loaded boat has a verified passage, fuel budget and return cutoff. Engine horsepower alone cannot establish range.

Species are regional targets, not catches at the pin. Protected-site markers are not fishing recommendations. Source links: page 3.

Thoddoo context, map key & evidence

Island reference positions and direct-distance comparison | Click numbered island pins to open Google Maps

© OpenStreetMap contributors | openstreetmap.org/copyright | WGS84 reference positions

THE BUSINESS IMPLICATION

Prioritise Baa. The Goidhoo island group is closer to Thoddoo. Vaavu uses materially more of the day in transit, reducing fishing time and increasing fuel exposure. Neither map establishes a safe passage.

Destination	One way	Return total	Role
Goidhoo	26.2 nm	52.4 nm	Baa lunch
Fulhadhoo	26.9 nm	53.8 nm	Baa fishing base
Fulidhoo	53.0 nm	106.0 nm	Vaavu focus
Keyodhoo	68.4 nm	136.8 nm	Wider reference

Calculated between island reference centres. These are straight-line lower bounds, not navigable routes. Reef detours, fishing movement and the skipper's fuel reserve must be added.

READ THE PINS CORRECTLY

1 Teal circles: island hubs / documented fishing departure bases.

3 Amber diamonds: geographic scouting references; catches unverified.

P1 Red markers: selected protected-area reference centres, not boundaries.

Before selling the long trip: log loaded cruise speed, litres used, fishing-engine hours and return time on a trial. Sound and record actual permitted fishing marks with method, tide/current and catches. Use nautical charts for navigation.
